

MEMBER EXPERIENCE GUIDE

Designing a Premium Progress Experience

A consistent service. A personal conversation.

01 / Choose the role of assessment

Make body composition part of a service your team can explain and deliver consistently.

Model	Member offer	Operational question
Included benefit	Assessment and reviews included in premium membership	Can the team deliver the agreed frequency for eligible members?
Coaching introduction	Assessment helps identify relevant training or coaching support	Who handles the consultation and appropriate follow-up?
Specialist service	A paid assessment or defined coaching package	What exactly is included and who receives the revenue?

Define your service

Chosen model / eligible membership or audience

What is included / assessment price if applicable

Appointment owner / booking route

Review timing / named review owner

Use the sample appointment on page 2, the delivery checklist on page 3 and the follow-up copy on page 4. The CSV worksheet lets you allocate owners and record service improvements.

02 / A sample welcome appointment

Illustrative 30-minute service plan. Test timings with your team and adapt to member needs and device instructions.

Time	Experience	Staff action
0-5 min	Welcome and goals	Ask what the member wants to achieve and explain the appointment.
5-10 min	Prepare and measure	Follow device guidance, confirm suitability and complete the measurement.
10-20 min	Understand the result	Discuss relevant measures in plain language alongside training and feedback.
20-25 min	Choose a next step	Agree a practical action and appropriate support.
25-30 min	Book the review	Confirm the next appointment, owner and any preparation guidance.

Before arrival

Confirm the appointment, share the appropriate preparation guidance and make the booking easy to change. Have trained staff, the device and the member-record process ready.

Keep the conversation personal

What would you like to feel more confident doing? What would make this membership worthwhile for you? Let us use that as the starting point for your programme.

TRU Alpha's listed 24-second measurement is not the full appointment length. Preparation, interpretation and discussion need separate time.

03 / Staff service checklist

Allocate ownership before launch. Record the status and next action in the accompanying CSV.

Service standard	Owner	Checked
Invitation explains the purpose, inclusions and appointment length	Reception	[]
Preparation guidance follows current device instructions	Measurement lead	[]
Appropriate private space is available	Club manager	[]
Staff are trained for their part of the process	Team lead	[]
Results are discussed in clear, member-friendly language	Coach	[]
Questions outside staff competence have an escalation route	Team lead	[]
A relevant action is agreed with the member	Coach	[]
The next review is booked before departure	Reception / coach	[]
Member records are handled through the club's approved process	Club manager	[]
Feedback and service issues are reviewed regularly	Service owner	[]

Define the handover

Who explains results / who books the next review

Escalation contact / support route

The aim is a reliable service with room for individual needs. An assessment should not automatically lead to a paid coaching recommendation.

04 / Invitation and follow-up wording

Replace the bracketed details and use your club's normal permitted communication process.

Welcome invitation

Welcome to [club], [first name]. Your membership includes [assessment and review details]. At your first appointment, we will discuss your goals, establish a body composition baseline and agree a useful next step for your training.

Allow around [appointment length]. Book at [link]. We will send the preparation guidance before you arrive.

After the appointment

It was good to meet you, [first name]. We agreed to focus on [goal / next action], with support from [coach / programme]. Your next review is booked for [date] with [name]. If your plans change or you have a question, contact us at [route].

Review invitation

Your progress review is due. Let us look at how things have been going, discuss any changes and plan your next step. Book at [link] or speak to [team / coach]. Please follow the preparation guidance shared by our team.

Keep sensitive results in the appropriate private member system. Use service messages to explain the next action without placing measurement data in group communications.

05 / Review the experience

Combine member feedback with evidence that the service is being delivered. Use the worksheet to record improvements.

Measure	How to use it
Assessment uptake	Unique members assessed / eligible members offered the service
Appointment completion	Completed appointments / appointments booked in the period
Review return rate	Members completing their due review / members due a review
Coaching referrals	Relevant referrals recorded, with follow-through tracked separately
Member feedback	Ask what was useful, unclear or missing; record the response rate
Staff capacity	Full appointment time, staffing cover and recurring service issues

A short feedback question

How useful was this appointment in helping you understand your next training step? What could we make clearer or more useful?

Service review owner / review frequency

First improvement to test / due date

Treat retention as a longer-term outcome to evaluate with an appropriate comparison, not as an immediate result of assessment uptake.
